

TOWN OF SAINT ANDREWS

The Town of Saint Andrews encourages residents to help celebrate Earth Day 2022. As part of the Town's commitment to climate change and the Year of the Garden, over the course of the year, we will be planting 70 new native species of trees in our community. We encourage everyone to take some time today and appreciate the Earth we all share.

Some ways to celebrate Earth Day:

1. Plant wildflowers and native plants to support pollinators.
2. Clean up plastic in your neighbourhoods, greenspaces, and shorelines.
3. Reduce, Reuse, and Recycle in the Garden.
4. Conserve water when possible.
5. Get out and get active through active transportation.

Check out the Environment Advisory Committee webpage for more tips and ideas at
